ABOUT ME 02

A wide tech spread dev and cybersecurity enthusiast. I write code, deploy it, protect it. Also love doing something with my hands and 3d printer. I enjoy learning everything about computers, math, neurobiology and much more.

SKILLS 03

Python	Rust
C++	Zig
Linux	Docker
Git	Docker compose
VSCode	Networking
Nginx	Build tools

EXPERIENCE 04

2019 — Present

Freelance / Independent

100+ freelance orders; software solutions used by thousands. Work includes high network usage services, desktop apps, full infrastructure.

LANGUAGES 05

Russian	Native
English	B2
German	A1 · Goethe-Institut

PROJECTS 06

Rust | Lib | Atomics

MagicOrb ring buffer

A small rust library with one structure - thread-safe, overwrite, heap-stored, fix-sized, locking ring buffer. It was written to potentially fix a problem with slow access to steam data from ssh connection in another thread.

C++ | Cmake | Meson | SDL2

Template for C / C++ + SDL project.

A small repo with examples setting up a C / C++ project with SDL libraries and Cmake / Meson build tools. It shows exaple and explains configs and structure.

Python | Docker

Docker controller tg bot

Async telegram bot, that lets you get info about docker composes and containers, running in a system. Let's you start, stop them. And notifies you, when running container exits.

Rust | Rayon | CV | ROS2

Lidar obstacle detector

Solution for Moscow DepTransport, that uses lidar points to find metro train path and detect obstacles.

CERTIFICATIONS 07

2024 - ООО “РусБИТех-Астра”

Astra Linux - Administration

OS Astra linux special edition 1.7 administration.

2024 - ООО “РусБИТех-Астра”

Astra Linux - Administration

OS Astra linux special edition 1.7 for users.

2024 - ФГАОУ ВО “ГРУ Нефти И Газа”

BaseAlt - Sybersecurity

Cybersecurity in OS Alt - course.
